Personal Statement

I am a Computer Science graduate from the University of Baltistan, Skardu, in the Gilgit-Baltistan region of northern Pakistan. I have a strong interest in Artificial Intelligence and Machine Learning and I am actively building real projects in these areas. I am seeking an MS scholarship to develop my research capabilities under expert guidance and contribute to technology solutions that benefit communities in developing regions like my own.

Research Area

- Machine Learning
- Artificial Intelligence
- Data Science

Academic Background

BS Computer Science (2021 - 2025)

- Institute: University of Baltistan Skardu (UOBS), Gilgit-Baltistan, Pakistan
- CGPA: 2.8 / 4.0
- Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Python Programming, Artificial Intelligence

Final Year Project

Smart Electricity Billing Management System

Contributed to UX and UI design of both the Android mobile application and the web-based backend system, including screen layout design, button placement, user flow mapping, and interface wireframes. Also responsible for all project documentation including UML diagrams, DFDs, use case diagrams, and test case specifications. The system used OCR (ML Kit) for meter reading, Python (Django) backend for automated bill generation, and Jazz Cash for payments.

Award: Best Project — UOBS Computing Society Project Expo 2024

Machine Learning Projects

Pakistan Flood Risk Predictor — *Python, scikit-learn, pandas, seaborn* | 2026

- Built a binary classification model to predict flood risk (HIGH or LOW) using 50,000 environmental records
- Performed feature engineering — converted raw Flood Probability scores into binary labels

- Trained and compared Random Forest and Decision Tree classifiers
- Random Forest achieved 97% accuracy on test data
- Created 4 professional visualizations including correlation heatmap, feature importance chart, and model comparison
- Key finding: Monsoon Intensity and Topography Drainage are the strongest predictors of flood risk in Pakistan

GitHub: github.com/Sulemanali002/pakistan-flood-risk-predictor

Titanic Survival Prediction — *Python, scikit-learn, pandas, matplotlib* | 2026

- Built a Random Forest classifier to predict passenger survival using the classic Kaggle Titanic dataset
- Performed data cleaning, missing value handling, and categorical encoding
- Achieved 83% accuracy on test data
- Visualized feature importance showing Sex and Fare as strongest survival predictors

GitHub: github.com/Sulemanali002/titanic-survival-prediction

Glacier Lake Outburst Flood (GLOF) Risk Classifier — Geospatial ML project focused on Gilgit-Baltistan glacier lakes using ICIMOD and NASA satellite data.

Professional Experience

Digital Community Manager | Cozycozy

June 2026 - Present

Remote | Freelance

- Manage community engagement across Reddit and Facebook for an international travel accommodation aggregator
- Create organic content and respond to user queries to build authentic brand presence in travel communities
- Develop content strategies that increase community participation and user trust

eBay Virtual Assistant | Training Company | On-site Internship

2023 - 2024

Duration: 3 Months

- Product listing creation and optimization on the eBay platform
- Product research, competitor analysis, order processing, and customer communication

E-Commerce Training | Luminex / SCO Baltistan — Software Technology Park Skardu

Jan 2025

- Completed professional training on e-commerce operations and digital business

Certifications

Feature Engineering for Machine Learning in Python

DataCamp

Feb 2026

Introduction to Data Science in Python

DataCamp

Feb 2026

Understanding Machine Learning

DataCamp

Feb 2026

Understanding Artificial Intelligence

DataCamp

Feb 2026

AI for Beginners	HP LIFE Foundation	<i>Feb 2026</i>
Data Manipulation with pandas	DataCamp	<i>Aug 2026</i>
Introduction to Deep Learning in Python	DataCamp	<i>Aug 2026</i>
Introduction to TensorFlow in Python	DataCamp	<i>Aug 2026</i>
Linear Classifiers in Python	DataCamp	<i>Aug 2026</i>
Unsupervised Learning in Python	DataCamp	<i>Aug 2026</i>

Awards & Recognition

- Best Project Award — UOBS Computing Society Project Expo, University of Baltistan Skardu (2024)
- Certificate of Appreciation — Tech Expo and Fun Fair 2024, UOBS Computing Society

Volunteer & Community

Volunteer & Member | UOBS Computing Society *2021 - 2025*

- Active member of the university Computer Society — assisted in organizing seminars, workshops and student events
- Participated in World Environment Day event organized by WWF-Pakistan and UK International Development (June 2024)

Private Tutor | Skardu, Pakistan

- Provided home tuition to school-level students and assisted in academic improvement and exam preparation

Professional Skills

Programming	Python JavaScript Java
Data & ML	Pandas NumPy Scikit-learn Matplotlib Seaborn Jupyter Notebook
Design & Tools	UX/UI Design Wireframing MS Office Canva Filmora
Languages	English (Working Proficiency) Urdu (National Language) Balti (Mother - Language)
